

Green Campus Policy

Introduction

Allenhouse Institute of Management envisions a clean and green campus where eco-friendly practices and education merge to promote sustainable systems. The green campus initiative provides an opportunity to lead by example in redefining green culture, fostering environmental ethics among students and staff. The institute promotes a clean and green campus by adopting, practising, and promoting environmentally friendly practices, generating eco-consciousness within the campus and beyond.

Vision

The vision of Allenhouse Institute of Management's green policy is to create awareness among students and all stakeholders about various environmental harms and to sustain natural resources.

Mission

- To educate students about their individual responsibility to initiate actions that save the environment.
- To raise consciousness among students about the harmful effects of environmental degradation.
- To encourage students to take small steps in conserving the environment.

Objectives

- To help students understand the importance of the environment and identify problem areas.
- To train students to raise public awareness about environmental issues.
- To encourage students to keep the environment safe and clean.
- To promote the adoption of environmentally friendly practices, such as using paper bags and minimising the use of polluting products.

Environmental Policy

Allenhouse Institute of Management emphasises environmental quality and aims to protect its environment by implementing green campus initiatives and maintaining a pollution-free, clean campus. The institute's commitment to managing its campus sustainably is demonstrated in the following areas:

- *Green Environment and Clean Campus*
- *Solid Waste Management*
- *E-Waste Management*
- *Liquid Waste Management*
- *Maintenance of Water Bodies*
- *Water Conservation and Management*
- *Paperless Operating Procedures*
- *Landscaping with Trees and Plants*
- *Energy Use and Conservation*
- *Air Pollution Management*
- *Restricted Use of Automobiles*
- *Ban on Single-use Plastics*

Implementation and Practices

Solid Waste Management

Allenhouse Institute of Management aims to minimize waste generation. Solid waste is segregated into biodegradable and non-degradable categories and handed over to waste collectors as part of the Swachh Bharat initiative. Dustbins for dry and wet waste are placed strategically around the campus to maintain cleanliness and eco-friendliness. Sanitary disposal machines are used for eco-friendly disposal.

E-Waste Management

The institute tackles electronic waste (e-waste) by implementing efficient and cost-effective disposal methods. E-waste management is a critical aspect of our commitment to environmental sustainability.

Liquid Waste Management

Water, being a finite and crucial resource, is managed diligently. Students are educated about the importance of water conservation, which is essential for sustaining life and preventing future shortages.

Soil Management

The institute has initiated composting using bio-committing systems to generate biogas and organic fertiliser, promoting eco-friendly waste management.

Maintenance of Water Bodies

Rainwater harvesting pits and sewage treatment plants (STP) are in place to conserve and manage water resources efficiently.

Paperless Operating Procedures

Allenhouse Institute of Management is moving towards a paperless office environment by converting documents into digital forms and facilitating e-communication. The Learning Management System (LMS) stores and shares references, notes, syllabi, question banks, and study materials on an e-platform, significantly reducing paper usage.

Energy Use and Conservation

All offices, labs, and classrooms are equipped with LED bulbs to save and conserve energy. The institute is committed to using energy-efficient lighting solutions.

Air Pollution Management

The institute conducts periodic awareness programs for staff, students, and the community on environmental protection and maintenance. Rallies and events are organized to address environmental and health issues. Smoking and the use of tobacco products are strictly prohibited on campus, with clear instructions and signage in place.

Restricted Use of Automobiles

The institute encourages the use of public transportation and shared transportation to reduce the environmental impact of driving. Patterns of parking and driving around the campus are managed to minimise environmental impact.

Accountability and Transparency

To ensure accountability and transparency in implementing the Green Campus Policy, the following measures are adopted:

- Regular training and workshops on environmental sustainability for all stakeholders.
- Publicly accessible reports on the progress and activities related to the green campus initiatives.

- An open and anonymous grievance redressal system for reporting environmental issues.
- Continuous monitoring and evaluation of the policy's effectiveness by a designated committee.

This policy aims to create a sustainable, eco-friendly environment at Allenhouse Institute of Management. By adopting these practices, we commit to fostering a culture of environmental consciousness and responsibility within our institution.
